yellow rubber	0.05	0.05	0.0	0.5	0.5	0.4	0.7	0.7	0.04	.078125

How to use it

OpenGL

Multiply the shininess by 128!

```
mat[0] = ambr;
mat[1] = ambg;
```

```
  mat[2] = ambb;
  mat[3] = 1.0;
  glMaterialfv(GL_FRONT, GL_AMBIENT, mat);
  mat[0] = difr;
  mat[1] = difg;
  mat[2] = difb;
  glMaterialfv(GL_FRONT, GL_DIFFUSE, mat);
  mat[0] = specr;
  mat[1] = specg;
  mat[2] = specb;
  glMaterialfv(GL_FRONT, GL_SPECULAR, mat);
  glMaterialf(GL_FRONT, GL_SHININESS, shine * 128.0);
```

VRML97

Compute ambientIntensity as (0.212671*ambr + 0.715160*ambg + 0.072169*ambb)/(0.212671*difr + 0.715160*difg + 0.072169*difb)

```
Material {
  ambientIntensity  amb
  diffuseColor      difr digg difb
  specularColor     specr specg specb
  shininess         shine
}
```
